What is the Essential Rx Drug List?

The Essential Rx Drug List or formulary is a list of covered drugs used to treat common diseases or health problems. The drug list is selected by a committee of doctors and pharmacists who meet regularly to decide which drugs should be included. The committee reviews new drugs and new information about existing drugs and chooses drugs based on:

- Safety;
- Effectiveness;
- Side effects; and
- Value (If two drugs are equally effective, the less costly drug will be preferred)

How much will I pay for my drugs?

To figure out how much you will pay for a drug, the abbreviations in the table below appear in the Drug Tier column on the formulary. The copayment or coinsurance levels are defined in the table below. If you do not know your copayment or coinsurance for each tier, please refer to your Summary of Benefits or other plan documents.

<i>Abbreviation</i>	<i>Copayment/Coinsurance</i>	<i>Description</i>
1	Tier 1 copayment or coinsurance	Generic drugs
2	Tier 2 copayment or coinsurance	Preferred brand drugs
3	Tier 3 copayment or coinsurance	Non-preferred brand drugs, covered drugs not on the drug list and covered brand drugs that are approved for medical necessity by Health Net.
SP	Specialty copayment or coinsurance	Specialty drugs and covered injectable drugs. You may be required to obtain some drugs from a Specialty Pharmacy. Prior authorization may be required.
GP	You may pay your Tier 3 copayment or coinsurance	Generic drugs are preferred. To get a brand drug that has a generic available, your doctor must request prior authorization to show medical necessity. If Health Net approves the request, you will pay your Tier 3 copayment or coinsurance.
PV	\$0	Preventive benefit drugs. These drugs must be covered at no cost to members under the Affordable Care Act. A deductible does not apply. To get a brand drug that has a generic available, you only pay the difference in cost between the brand and generic drugs.

How do I use the drug list?

Look for your drug in the index at the end of this booklet. The index lists all of the drugs on the drug list. Both brand name drugs and generic drugs are listed in the index. Next to your drug, you will see the page number where you can find your drug.

What if my drug is not on the drug list?

If your drug is not on the drug list, call us at the telephone number on your Health Net ID card and ask if your drug is covered. If your drug is not covered, you can ask your doctor to prescribe a similar drug that is covered. If your doctor feels you need to have the drug that is not covered, your doctor can ask us to make an exception.

What are generic drugs?

A generic drug contains the same active ingredient and works the same way as the brand name drug. Generic drugs are safe and effective, and generally cost less.

Generic drugs are available on the drug list at Tier 1. If you request a brand name drug that has an available generic version, you may pay a higher cost share.

Are there any limits on my drug coverage?

Some drugs have limits on coverage. The table below provides a description of abbreviations that may appear in the Limits column on the drug list:

<i>Abbreviation</i>	<i>Definition</i>	<i>Description</i>
AL	Age Limit	These drugs may require prior authorization if your age does not fall within manufacturer, FDA, or clinical recommendations.
PA	Prior Authorization	These drugs require prior authorization for coverage, effectiveness, or safety reasons. This means that your doctor must request approval from Health Net before the drug will be covered.
QL	Quantity Limit	These drugs have a limit on the amount that will be covered. Your doctor must request approval for a higher quantity of the drug from Health Net.
RX/OTC	Prescription & Over-the-Counter (OTC)	Certain drugs are available both in a prescription form and in an OTC form. Only prescription drugs are covered by your plan with the exception of some insulins, insulin supplies and some covered preventive drugs.
ST	Step Therapy	You must first try another specific drug(s) before these drugs will be covered.

How can I get an exception to the rules for drug coverage?

Your doctor can ask for an exception to our rules for drug coverage.

- Your doctor can ask us to cover your drug even if it is not on the drug list. If we approve an exception request for a drug not on the drug list, the non-preferred brand tier (Tier 3) or Specialty copayment/coinsurance will apply.
- Your doctor can ask us to make an exception for limits on your drug. For example, if your drug has a quantity limit of 1 tablet per day, your doctor can ask us to cover more.

To request an exception, your doctor can fax a prior authorization form along with a written statement supporting the request to us at 1-800-977-4170.

Can I go to any pharmacy?

To get the best benefit, you should use pharmacies that are in the network. These pharmacies have a contract with Health Net. Most chain pharmacies and many independent pharmacies are in the network. To find a pharmacy near you, visit our website at www.healthnet.com or call us at the telephone number on your Health Net ID card.

If you fill your prescription at an out-of-network pharmacy, the pharmacy may not be able to bill Health Net online so you may have to pay the full cost of your drug. Unless it is an emergency, your out-of-network prescription drug may not be covered.

Some injectable and high cost drugs may be considered “specialty drugs”. Unless otherwise noted, these drugs must be obtained from one of Health Net’s Specialty Pharmacies.

Can I use a mail order pharmacy?

You can use the CVS Caremark Mail Order Pharmacy for the home delivery of most maintenance drugs. Maintenance drugs are those that you take daily and are needed for a long term condition. To use the mail order pharmacy, your doctor must provide new prescriptions that allow up to a 90-day supply of each drug. Mail order forms are available on our website at www.healthnet.com or you may call us at the telephone number on your Health Net ID card to request a form.

How can I save money on my prescription drugs?

You can save time and money with these simple steps:

- Ask your doctor about generic drugs that may work for you.
- Fill prescriptions at Health Net participating pharmacies.
- Be sure your doctor prescribes drugs on the drug list
